

# IMPORTANT INSTRUCTIONS

## DELUXE PORCELAIN

# 5½ INCH CLAMP LAMP

ITEM# LF-11

**READ AND SAVE ALL SAFETY INSTRUCTIONS BEFORE OPERATING CLAMP LAMP FIXTURE**

## ASSEMBLY

Congratulations on your purchase of Zoo Med's Deluxe Porcelain 5.5" Clamp Lamp. Please read these instructions prior to use of your new lamp, and contact Zoo Med if anything is missing or unclear. This lamp is designed to accept a bulb or ceramic heat emitter of up to **100 watts**.

In addition to the ceramic fixture base with black reflector, your lamp should include **1 EACH** of the following parts:  
(Contact Zoo Med if parts are missing.)

CLAMP ARM

CONNECTOR

**ATTACH CLAMP ARM** In order to attach the **clamp arm** to the base of the fixture you need to use the **connector** (looks like a pair of curved grips/brackets, connected to each other by a screw). On one end are the curved flattened arms that go around the ceramic base of the lamp. The knurled ball on the end of the **clamp arm** should go in the other end of the **connector**. You may have to loosen the screw to get the brackets to open wide enough to go around the ceramic socket. When everything is in place simply tighten the screw.

## USAGE

To use the clamp lamp, first make sure that it is unplugged and that the inline switch is in the **OFF** position (the raised bump on one side of the switch indicates the **ON** position).

ON/OFF SWITCH

Securely clamp, hang, or mount the lamp in the desired safe location (always outside of the enclosure) and insert an appropriate bulb or ceramic heat emitter. **See Warning section for specifics on compatible lamps/heaters, and safe lamp placement.**

## WARNING

- **DO NOT USE A LAMP OR HEATER OF MORE THAN 100 WATTS!**
- **DO NOT** splice, repair or modify.
- **DO NOT** use in wet conditions.
- Use indoors only.
- Keep children and pets away from fixture.
- Fully insert plug.
- Unplug when not in use.
- Fully extend cord before using.
- **DO NOT** cover with blankets, rugs or any material.
- **DO NOT** use damaged cord sets — inspect periodically.
- **DO NOT** exceed electrical rating.
- This Lamp is for use **ABOVE** screen top reptile terrariums or wire iguana cages only. **NOT** for use **INSIDE** any animal cages or terrariums (risk of fire).
- Make sure clamp is **SECURELY** suspended above terrarium with appropriate hanging items. Zoo Med's New ReptiLamp Stand is a good choice for suspending this lamp.
- Avoid overheating your terrarium.
- Make sure wattage of bulb or ceramic heat emitter is correctly rated for your size terrarium.

ZOO MED REPTILAMP STAND

This appliance has a **POLARIZED** plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not modify the plug in any way.
